

I feel strongly that the FCC should not be involved with the 02-278 proceeding. The individual states should be making the decisions concerning privacy laws for their state - especially Indiana.

I do not want any telemarketing calls coming into my home day or night. The calls did come in around supper time - atleast 4 per evening. Now, we receive very few if any - thank goodness! The FCC should not emplement any proposal that would lessen Indiana's Telephone Privacy law protection.11/18/02
